

Hay Handling Attachments

for Wheel Loaders, Skid-Steer Loaders, Telescopic Handlers and Backhoe Loaders

DYMAX TAKES THE CHORE OUT OF HAY HANDLING

Dymax features a number of high-quality, high-efficiency hay handling attachments for wheel loaders, skid-steer loaders and telescopic handlers. Models for backhoe loaders are also available.

Above: **Big Bale Handler.**

Above middle: **Big Bale Handler** with Hydraulic Bale Side Clamps.

Above right: Single Bale **Big Bale Handler.**

Big Bale Handler

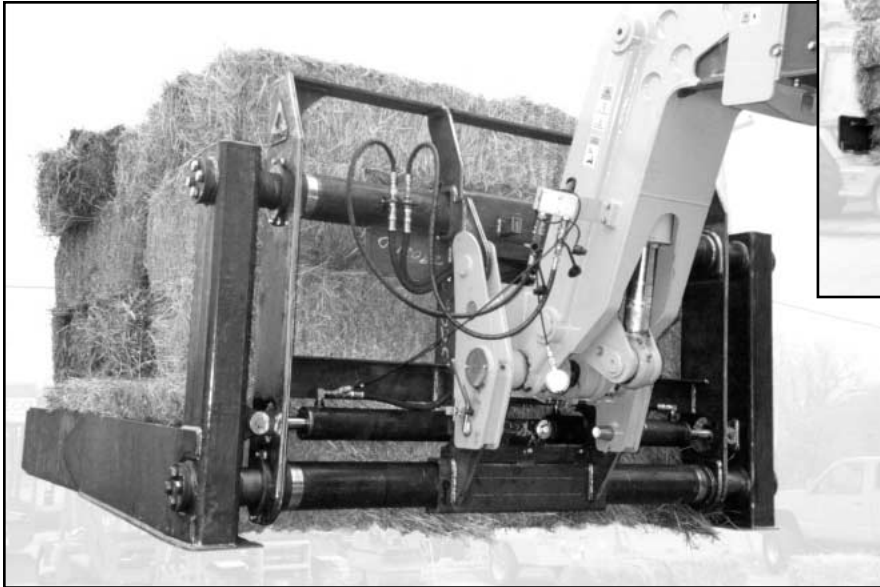

- **Dymax Big Bale Handlers**, featuring four tapered bale spears and four stabilizing bale spikes, are the tool of choice for handling two large, rectangular bales. A single-bale model is also available.
- Tapered bale spears easily penetrate bales, while the slender design minimizes sticking and "grabbing" upon removal. Bale spikes prevent "tearing" of the bale.
- The **Big Bale Handler** is available with or without hydraulic bale side clamps.

Manure and Hay Fork

- The design of the **Dymax Manure and Hay Fork** provides precise and secure operator control of a variety of sizes and conditions of hay, straw and manure.
- Customized features can be incorporated into the **Dymax Manure and Hay Fork**, including a variety of widths, tine length and tine spacing.

Hay Handling Attachments

Move mountains of hay with the **Dymax Hay Bale Squeeze**.

The **Hay Bale Squeeze** is available with a hydraulic side-shift option to assist with placing stacks of small bales in tight spaces.

Hay Bale Squeeze

- The **Dymax Hay Bale Squeeze** is the newest addition to our line of hay handling attachments.
- Powerful double cylinder action puts the squeeze on bales, ensuring fewer dropped bales.
- The **Dymax Hay Bale Squeeze** handles large square bales or stacks of small square bales with ease.
- Squeezing action of the **Dymax Hay Bale Squeeze** offers advantages over bale spears or forks when working with stacks of smaller bales.
- With the proper high-capacity machine, the **Dymax Hay Bale Squeeze** can lift a complete stack of small bales.

Bale Spear with single 44" spear.

Bale Spear

- The **Dymax Bale Spear** is the staple of many hay-handling operations, whether it's mounted on a skid-steer loader, wheel loader or backhoe loader.
- **Dymax** has been building bale spears for nearly two decades, and our quality is second to none.
- Standard spear capacity is 2,200 lbs. Heavy duty spear capacity is 2,900 lbs.
- The most popular spear style features one 44" spear on top with two 12" stabilizers below. A model with two 44" spears is also available.
