

Culvert Cleaner

After

Before

During

- ★ *Clean any culvert from 12 inches (305mm) to 24 inches (610mm) with a single operator*

- ★ *Extensions allow cleaning up to a 40 ft. (12.1m) long culvert*
- ★ *Lower culvert repair costs; labor costs*

A unique and innovative attachment for a most difficult task. Eliminate the need to tear up driveways, roads and landscaping to replace plugged or problem culverts. Culverts can get plugged from rain washing debris and silt into them and once they are plugged, the problem compounds.

This attachment is easily hooked up to a skid steer loader quick attach and allows one operator to effectively and efficiently clean any size culvert up to 24 inches (610mm) in diameter. The culvert cleaner is designed to clean any culvert sized from 12 to 24 inches (305 to 610mm) by utilizing different brushes.

Brushes are made of a poly urethane and are available in different sizes from 12 inches (305mm) through 24 inches (610mm) in diameter to fit the appropriate sized culvert for maximum performance.

Includes 6 extensions in lengths of 80 inches (2032mm) each to allow the culvert cleaner brush to get completely through the culvert opening on the opposite side up to 40 ft. (12.1m) in length.

Culvert Cleaner

SPECIFICATIONS

FITS SKID STEER LOADERS

Features/Benefits:

- Clean culverts with less labor costs
- Clean culverts from 12 to 24 inches (305-610mm) in diameter
- Clean culverts up to 40 ft. (12.1m) in length

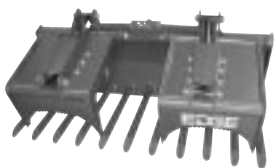

Specifications:

Width 45 in. (1143mm)
Length 90 in. (2286mm) - transport position
14 ft. 5 in. (4395mm) - extended position
Height 8 ft. 4 in. (2541mm) - transport position
Weight 340 lbs. (127kg)
Extensions 6 extensions at 80 in. (2032mm) each total reach of 40' (12.1m)

Max Hydraulic Req. 20 GPM (75.5 LPM)
Unit Requirements 5 GPM (19LPM) @1800 PSI (124bar)
Hydraulic Motor 11.9 cu.in. Rev. with 3011 in/lb of torque @89RPMs
Brush Sizes 12 in (304.8mm); 15 in (381mm); 18 in (457mm);
21 in (533mm); 24 in (609mm)
