silt fence

 *Mounts on your existing trencher*

 *Multi-Purpose unit can be used for silt fence installation and backfilling trenches*

 *Installs up to 40 ft/min with a single operator*

The EDGE Silt Fence Installer allows installation of silt fence material effortlessly, and effectively by one person. The EDGE Silt Fence Installer allows production rates of up to 40 ft/min with an experienced operator.

Maintenance is virtually eliminated because of the simplicity of the design.

The offset blades return the soil to the trench creating a unique Z-shaped anchoring system that virtually locks the silt fence in place even before compaction.

Install stakes and fasten the silt fence to complete the job. Can be installed on any trencher.
