

STRAIGHT BLADE

Trip-Edge

Snow Plow

A Trip-Edge That's Loaded With Features.

The Loegering Trip-Edge Plow features all the tough, reliable characteristics you'd expect from Loegering, such as reinforced diagonal cross-bracing for a stronger blade and fast and reliable hydraulics.

Continuous Moldboard

Our moldboards are built in one continuous piece so the blade skin will not separate from the ribs over time, unlike other plows, which are seam-welded across the top and bottom of the blade.

Our moldboards are built in one continuous piece so the blade skin will not separate from the ribs over time, unlike other plows, which are seam-welded across the top and bottom of the blade.

Push Frames

Push frames are constructed with a 3x2-1/2 by 3/8-inch channel and 1/4-inch tubing, twice as thick as competitors.

Heavier Pivot Pins

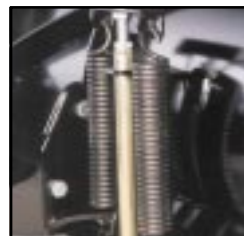

One-inch diameter trip-angle pivot pins for base angle and high-strength steel reinforces the pivot points. Larger pins mean longer life and less wear.

Protected Blade Shoes

The cast-iron blade shoes are tucked up and under the base angle to prevent wear and damage while plowing.

SPECIFICATIONS		
TRIP-EDGE PLOWS	8'	9'
Moldboard Width	96"	108"
Plowing Width	83" at full 30° angle	93 1/2" at full 30° angle
Moldboard Heights	30-1/4"	30-1/4"
Moldboard Thickness	11-gauge steel (approx. 1/8")	11-gauge steel (approx. 1/8")
Reinforcement Ribs	6 vertical 2 diagonal	8 vertical 2 diagonal
Trip Springs	4	4
Angle Cylinders	1-1/2" rod by 10" stroke	1-1/2" rod by 10" stroke
Plow Weights	790 lbs	830 lbs
Powder-coat painted		
Positive mechanical stop prevents angle cylinders from bottoming out		
Optional bolt-on 1/2" x 6" 1080 steel cutting edge		
2 cast-iron blade shoes tucked behind the trip edge		
Universal skid-steer mounting blank		
No control box needed, operates with skid-steer auxiliary hydraulic controls		

Adjustable Trip Springs

Allows the cutting edge to trip when it encounters ice or manhole covers, while holding the moldboard rigid for pushing heavy snow. Only the cutting

edge trips and the snow load remains in tact.
