

Grader and Laser System

EDGE

- Grader with laser system saves time and material
- Grader is perfect for sub-grading and blacktop preparation
- Laser provides complete, precise control with little training

A perfect tool for re-shouldering, sub-grading and blacktop preparation, the EDGE grader also offers complete, precise control with a laser system. The grader features a super-strong moldboard, and its large tires afford excellent maneuverability. Enjoy simple, precise grader control with the optional laser system, and achieve material and labor savings

Grader Specifications:

Model	Blade Width, in (mm)	Overall Length, in (mm)	Recommended Power, HP (kW)
GA8U	96 (2438)	101 (2565)	45 (33.55)
