

# WATCHGUARD GENERATOR SERVICE

A Comprehensive 64-Point Inspection

Level 1

- Inspect and test engine, generator, transfer switches, day tank, battery charger, engine block heater, gauges, and meters
- Thoroughly check emergency engine safety shutdown systems
- Test oil and coolant for contamination (ensuring they meet manufacturer's specifications)
- Provide written analysis of the inspection which will also identify areas requiring further service
- Dispose all parts and fluids per EPA standards
- *Recommended every 6 to 12 months*

## MINNESOTA
