

Watchguard Generator Service

Level

17

Watchguard Service is a Ziegler preventive maintenance and inspection program, custom designed to help reduce generator operating costs, prolong component life and increase the overall reliability of your equipment.

Level 17: A Comprehensive 57-Point Inspection Plus Maintenance

- Inspect and test engine, generator, transfer switches, day tank, battery charger, engine block heater, gauges and meters
- Check emergency shutdown systems
- Change engine oil and replace fuel and oil filters
- Test oil and coolant for contamination
- Provide written analysis of the inspection and identify areas requiring further service
- Dispose of all fluids per EPA standards

- Recommended every 12 months
- 30-minute load bank test available at additional cost
