

Infrared Thermography

Advanced Electrical Services from Ziegler Power Systems can help identify concerning hotspots and safety hazards by using infrared technology. Our certified thermographers can complete the testing without de-energizing your system.

Infrared Thermography

- ⚡ Survey key components, including energized bus, load lugs, cable termination points, control cabinets, contactors, fuses, and control transfers
- ⚡ Record temperature differences between troubling areas and a reference area
- ⚡ Provide comprehensive reports detailing deficient areas with photographs and recommended actions
- ⚡ Recommended frequency: Every 12 – 24 months

Ziegler Preventive Maintenance Service *Protect Your Power*

Ziegler Power Systems preventive maintenance service offers multi-year budget planning and delivers improved equipment reliability.
