TRAIL KING

DEPENDABLE PERFORMANCE

DESIGNED TO PERFORM...

ENGINEERED TO LAST.

The Advantage Series Bottom Dump is engineered to be lightweight, yet rugged and strong. Its lightweight cross-bracing and gusset design minimizes the twisting and flexing in critical stress areas while delivering maximum weight savings. The result... you can haul more payload, even with the toughest loads and under the toughest hauling conditions.

The Trail King Advantage Series Bottom Dump... destined to be the best bottom dump you'll ever own.

TRAIL KING

ADVANTAGE SERIES BOTTOM DUMP TRAILER

STANDARD FEATURES

Full Oscillating Fifth Wheel Plate features a spherical, chrome-bushed design that reduces wear and provides longer service life than a shaft and bushing design.

Large 11' 6" Clam and 64" x 99" hopper opening, combined with nearly vertical hopper walls, delivers complete dumping of even the stickiest materials.

Chrome-Bushed Spherical Bearings on the ends of the gate equalizer arms reduce wear and ensure long, trouble-free service life.

Full-Width Fenders, both front and rear, are sloped to shed material more effectively.

Adjustable 11-Position Gate Stop is conveniently positioned on the side of the hopper so the gate setting can be adjusted without crawling under the trailer.

Oil-Impregnated Bronze Bushings at the gate pivot pins ensure smooth operation, long life, and simplified replacement.

Other Features Include:

Pin-Style Landing Legs

Windrow Deflector

One-Piece Unitized Design
of the hopper and frame simultaneously provides optimum strength and maximum weight savings.

Lightweight Cross Braces
tie the frame together in a way that minimizes the flexing and twisting that can cause cracking in critical stress areas.

Optional Variable Gate Control

Large Air Reservoir,
with air system oiler, means both longer operating time and better control. Optional dual-tank configuration (see inset).

Two-Component Paint Finish
The entire trailer is primed and painted with a two-component polyurethane primer and paint, after which electrical lines are installed.

Bolt-On Push Block
(also available with pinte hitch)
