

SIMPLE OPERATION.

Mechanical controls provide simple and reliable operation. Push button keypads for feeder system and cable operated ground drive controls allow operation from either side of the machine.

DURABLE COMPONENTS.

Highway class chains, conveyor and auger bearings and direct-drive conveyor head shaft provide long-term reliability. Replaceable components maximize the life of the paver.

HEAVY DUTY SCREED.

The Weiler designed 3,000 lb (1,360 kg) screed delivers outstanding mat quality and a paving range of 7' 8" (2.3 m) to 14' 4" (4.4 m). Weiler's patented end gate design allows quick adjustments for extension height and joint matching.

POWER TO PUSH.

Cat® C3.4B Tier 4 engine with 74 hp (55 kW) powers the best-in-class 70" (1778 mm) track length undercarriage through a 2-speed hydrostatic drive. Optional 14" (356 mm) performance, poly pads and standard 125 mm track chain pitch optimize the ride with a 250 fpm (76 mpm) max transport speed.

PRECISE CONTROL.

Screed mounted upper and lower 9" (228 mm) augers and independent control of each side of the delivery system provide precise material control for variable width paving. Flow gate style cut-off doors and reversible augers and conveyors limit spillage between passes.

FAST SERVICE.

Remote grease lines, spray down system with four (4) coiled hoses located on each corner of the paver, five (5) engine access doors and Caterpillar dealer service and support keep your machine up and running with limited machine down time.
